* LEED (Leadership in Energy and Environmental Design) is an internationally recognized green building certification system. It is the International reference for design, building and management of environmental friendly, high-performance buildings.
2. **Smart White reflectance concept**

Mapeplan T Smart White is produced with a special white colour on the top surface which ensures an optimal solar reflectance. Mapeplan T Smart White reduces of over 50% the roof temperature, if compared to a dark / black roof. Mapeplan T Smart White, therefore, reduces the internal temperature of the building and keeps it constant.

![Diagram showing the difference between dark and smart white covers in terms of temperature regulation.]

---

**Responsability Mission**

![Image of the CRRC logo and table showing initial and weathered solar reflectance and thermal emittance.]

---

- Lower emissions
- Lower surface temperature
- Lower pollution
- Increased energy saving

---

**Note:** The table indicates an initial solar reflectance of 0.8 and weathered solar reflectance of 0.88, with thermal emittance remaining at 0.98. The product is currently pending certification by the Cool Roof Rating Council.
3. Production Process
• Factory quality system certified according to ISO 9001/2000 standard

• **Multi-extrusion coating** production line of latest generation

• One passage production process, insertion of internal reinforcement without pre-lamination

• Environmental friendly feeding vacuum pipes system

• Constant digital control of the membrane's thickness

• Video electronic control of membrane's quality to both surfaces

• No stress membrane winding system

• Quality control tracking system

• Total quality concept: from formulation of raw materials until finished product
4. Roof application systems for TPO/FPO membranes

MECHANICALLY FIXED SYSTEMS

Mapeplan T M

Synthetic membrane in flexible polyolefin TPO/FPO with high-resistant polyester net reinforcement.
Mechanically fixed membrane system for exposed roof installations.
MAPEPLAN T M is produced in one multi-extrusion coating process, and insertion of internal reinforcement is without pre-lamination.
Standard colour of top layer is Smart White, the bottom layer is black.
Mapeplan T M is UV-resistant and may be exposed to all weather conditions.

<table>

<tr>
<th>Mapeplan T M</th>
<th>1.2 mm</th>
<th>1.5 mm</th>
<th>1.8 mm</th>
<th>2.0 mm</th>
</tr>
</thead>
</table>

(Other thicknesses are available on request)

Spot fixing system under overlaps: the membrane is fixed along the overlaps using screws and plate-fasteners, it is suitable for common structures (metal decks, concrete, wood, etc).
4. Roof application systems for TPO / FPO membranes

**CHARACTERISTICS OF MAPEPLAN T M:**

- High solar reflectance
- Environmental friendly
- Resistant to ageing processes
- Flexible at low temperatures
- Puncture resistant
- Hail resistant
- UV-resistant
- High workability and weldability
- Formulation without plasticizers
- Vapour permeable
- Dimensionally stable
- Excellent fire behaviour

1. Overlap / Hot air welding
2. Mechanical fixing system
3. Mapeplan T M, roofing membrane
4. Thermal insulation (mechanically fixed)
5. Vapour control layer, for example Mapeplan VB PE
6. Substrate
MECHANICALLY FIXED SYSTEMS

*Mapeplan T Mf*

Synthetic membrane in flexible polyolefin TPO/FPO with high-resistant polyester net reinforcement, fleece backed with 300gr/m² woven-non-woven polyester. Mechanically fixed membrane system for exposed roof installations. Suitable for installation on non compatible surfaces. MAPEPLAN T Mf is produced in one **multi-extrusion coating** process, and insertion of internal reinforcement is without pre-lamination. Standard colour of top layer is Smart White, the bottom layer is black.

Mapeplan T Mf is UV-resistant and may be exposed to all weather conditions.

<table>

(other thicknesses are available on request)

Spot fixing system under overlaps: the membrane is fixed along the overlaps using screws and plate-fasteners, it is suitable for common structures (metal decks, concrete, wood, etc.)
1. Overlap / Hot air welding
2. Mechanical fixing system
3. Mapeplan T MF, roofing membrane
4. Thermal insulation (mechanically fixed)
5. Vapour control layer, for example Mapeplan VB PE
6. Substrate

CHARACTERISTICS OF MAPEPLAN T MF:

- High solar reflectance
- Environmental friendly
- Resistant to ageing processes
- Flexible at low temperatures
- Puncture resistant
- Hail resistant
- UV-resistant
- High workability and weldability
- Formulation without plasticizers
- Vapour permeable
- Dimensionally stable
- Excellent fire behaviour
BALLASTED SYSTEMS

*Mapeplan T B*

Synthetic membrane in flexible polyolefin TPO/FPO with high dimensional stability glass mat reinforcement.
Suitable for ballasted and roof garden systems.
MAPEPLAN T B is produced in one multi-extrusion coating process, and insertion of internal reinforcement is without pre-lamination.
Standard colour of top layer is Smart White, the bottom layer is black.
Mapeplan T B is UV-resistant, resistant to microbiological attacks and is root-resistant.

<table>

<tr>
<th><strong>Mapeplan T B</strong></th>
<th>1.2 mm</th>
<th>1.5 mm</th>
<th>1.8 mm</th>
<th>2.0 mm</th>
</tr>
</thead>
</table>

(Other thicknesses are available on request)

Ballasted roof system: the membrane is ballasted with gravel, pavings, concrete slabs or roof garden.
CHARACTERISTICS OF MAPEPLAN T B:

- High solar reflectance
- Environmental friendly
- Resistant to ageing processes
- Root-resistant
- Resistant to microbiological attacks
- Flexible at low temperatures
- Puncture resistant
- UV-resistant
- High workability and weldability
- Vapour permeable
- Formulation without plasticizers
- Dimensionally stable
- Excellent fire behaviour

1. Overlap / Hot air welding
2. Ballast
3. Protection layer
4. Mapeplan T B, roofing membrane
5. Thermal insulation
6. Vapour control layer, for example Mapeplan VB PE
7. Substrate
ADHERED SYSTEMS

*Mapeplan* T Af

Synthetic membrane in flexible polyolefin TPO/FPO with high dimensional stability glass mat reinforcement, fleece backed with 300gr/m² woven-non-woven polyester. Adhered system for exposed roof installations with specific Mapei Mapeplan® ADS 100 adhesives. Suitable for installation on non compatible surfaces. MAPEPLAN T Af is produced in one multi-extrusion coating process, and insertion of internal reinforcement is without pre-lamination. Standard colour of top layer is Smart White, the bottom layer is black. Mapeplan T Af is UV-resistant and may be exposed to all weather conditions.

<table>
<thead>
<tr>
<th>Mapeplan T Af</th>

<th>1,5 mm</th>
<th>1,8 mm</th>
<th>2,0 mm</th>
</tr>
</thead>
</table>

(Other thicknesses are available on request).

Bonded system: membrane is adhered with Mapeplan® ADS 100 adhesive.
CHARACTERISTICS OF MAPEPLAN T Af:

- High solar reflectance
- Environmental friendly
- Resistant to ageing processes
- Flexible at low temperatures
- Puncture resistant
- Hail resistant
- UV-resistant
- High workability and weldability
- Formulation without plasticizers
- Vapour permeable
- Dimensionally stable
- Excellent fire behaviour

1. Overlap / Hot air welding
2. Mapeplan T Af fleece backed roofing membrane
3. Mapeplan ADS 100 adhesive
4. Fully bonded thermal insulation
5. Fully bonded vapour control layer, for example Polyvap SA bi-adhesive
6. Substrate
5. Accessories
MAPEPLAN T WALKWAY
Protection synthetic membrane in TPO/FPO with non-slip textured surface.
Mapeplan T WALKWAY is UV-resistant and may be exposed to all weather conditions.
Standard thickness: 1,8 mm.
Colour: grey.

MAPEPLAN T D
Unreinforced synthetic membrane in TPO/FPO, suitable for details and building particulars.
Mapeplan T D is UV-resistant and may be exposed to all weather conditions.
Standard thickness: 1,5 mm.
Colour: top layer Smart White, bottom layer black.

MAPEPLAN VB PE
Polyethylene vapour control layer.

POLYDREN
Separation and protection layers in woven-non-woven polyester or polypropylene.

The delivery program is complete with all accessories to perform the Mapeplan T roofing system.
